

2010-2024 6.7L CUMMINS ENGINE COVER

Covers installation of PN: WCF100730

(Before any installation of parts please verify you have received all parts on your packing list)

1. Remove engine oil dipstick and four 8mm bolts to remove engine cover.

2. Place your new engine cover into position and start all four of the newly provided bolts into the engine. Once they are all started, tighten them equally down by hand to avoid any damage. Install engine oil dipstick.
